

## What Is Going On Tonight

Motion Pictures and Songs at Broad Theater.  
Goethe Lodge, No. 78, meets in P. O. Hall, 100 Main St., at 8 o'clock.  
Slater Lodge, No. 509, N. E. O. P., meets in P. O. Hall, 100 Main St., at 8 o'clock.  
The German Club, No. 1851, R. A. meets in P. O. Hall, 100 Main St., at 8 o'clock.  
The German Club, No. 1851, R. A. meets in P. O. Hall, 100 Main St., at 8 o'clock.

## ANNOUNCEMENTS.

Frank A. Hill has a lot of ladies' dress suits and offers them now to close at \$2.48.

## BREED THEATER.

A brilliant bill of motion pictures has been provided for the patrons of the Breed theater, and it is headed by the flashing westerns, entitled "A Western Courtship." It is a unique presentation of the old adage that "true love never runs smoothly," and is filled with the breezy atmosphere peculiar to the better class of western stories. Photographically, it is perfect, and shows many of the beauty spots of the west.

## AT THE AUDITORIUM.

An entirely new set of motion pictures will be shown at the Auditorium today, and will include the Gaumont Weekly No. 32, which depicts many late and interesting happenings. Today will be the last chance to see the vaudeville numbers, which have been more than pleasing the patrons for the first half of the week, as tomorrow will bring three new acts full of originality and of good variety. The Boston Comedy Four, the feature of today's show, are going big, and are deserving of all the applause they receive. The best thing in the acrobatic line which has been seen here in a long time is presented by Schrock and Percival, a couple of marvels in the tumbling art. Clifford and Taylor are a versatile pair of comedians who are causing much favorable comment.

## GERMANY THREATENS HOLLAND

Will Divert Rhine Traffic by Canal Unless Tell Scheme Is Approved.

London, Aug. 13.—The Daily Mail prints a despatch from its Berlin correspondent saying that Germany is threatening Holland—that unless Holland withdraws her opposition to Germany's scheme to impose tolls on Rhine boats stopping at the latter's ports, Germany will divert the traffic by constructing a canal via Emden from the German Rhine to the North sea, thereby practically killing the lower Rhine as a channel between Rotterdam and the heart of the continent.

It is recalled that traffic on the Rhine was made toll-free to all nations by the treaty of 1858, the management of navigation being vested in a central committee representing Alsace-Lorraine, Baden, Bavaria, Hesse, Prussia and Holland. Germany has, for some time, been aiming to abrogate the treaty by imposing tolls and transferring the control of the river, including the Dutch ports, to an international board in which the balance of power will be vested in the German Rhine states.

## \$3,480,000 TO BETHLEHEM.

Greece Increases Figures for Armor and Guns on New Dreadnaught.

Washington, Aug. 12.—George H. Moses, United States minister to Greece, reported to the state department today that the contract for the construction of a battleship for the Greek navy has been signed. The share for armor and armament allotted to the Bethlehem Steel company has been increased by 20,000 pounds, making a total of \$3,480,000 going to the American company.

## Brief State News

Wapping—This looks like a prosperous year for Wapping as far as new building work is concerned.

New Haven—The will of the late Mrs. Lillian L. Weston was filed in the probate court the other day. She leaves an estate estimated to be worth \$100,000.

Ansonia—Nearly a dozen applications for appointment of superintendent of schools have been received thus far by the committee on schools of the board of education.

Stamford—A local friend of Roosevelt has given the local progressives \$500 for their campaign fund. The party organization in Stamford will be perfected at a meeting tonight.

Brantford—Free city delivery mail service will be given the town of Brantford about November 1 through the efforts of Representative Kelly, who has been laboring with the postoffice department in the matter.

New Britain—Playground Commissioner Edward L. Hannan and Miss Margaret Price, daughter of Mr. and Mrs. Michael Price, of Manchester, will be married Tuesday morning, August 27, at St. James' church in that town.

Thompsonville—F. W. Ailing of New Haven has been appointed wire chief of the telephone exchanges at Thompsonville and Windsor Locks. This work was formerly done by Manager George C. Basing at the Canal town exchange.

## NORWICH TOWN

Funeral of Mrs. Annie Kukla, Who Had Lived 98 Useful Years—Many Mourners at Funeral of Mrs. Patrick J. Lynch—Summer Visitors and Tourists.

The funeral of Mrs. Annie Kukla was held at 2:30 o'clock Tuesday afternoon from her home on Wawwac Hill road. Rev. Theodore Bauck conducted the service. There were beautiful flowers. Burial was in Yantic cemetery. Relatives were present from Montville, Waterford, New York city and New Jersey. Undertaker Charles A. Gager, Jr., had charge of the arrangements.

Mrs. Kukla was born 98 years ago in Germany and fourteen years since came to this country where she cared for her six grandchildren until they have secured positions of trust. She was a kind neighbor, hard working and cheerful in disposition. She kept old and new friends in the best of health and saw without the use of glasses.

## MENDING HUNCHBACKS.

Johns Hopkins Surgeons Believe They Can Solve Old Problem with the Knife.

Baltimore, Aug. 12.—Surgeons of the Johns Hopkins hospital are planning a series of interesting experiments during the coming term of the medical school for perfecting a new treatment for Pott's disease, commonly known as hunchback. If successful, the new treatment, which will consist of the use of mechanical appliances, such as plaster of paris collars, braces, and effect cures with the knife, in which the grafting of bone will figure conspicuously.

It is believed a method of treatment which would absolutely eliminate motion of the diseased vertebrae of the spine, of which there are nine pairs, and entirely relieve pressure on the affected bodies, would promise a rapid cure of the disease and prevent deformity.

It is thought that in the spine, the careful removal of the periosteum of the painful processes, transposed to bridge the gap between the vertebrae and with the traps between the thin bone shield called laminae, also bridged by bone, will lead to the extensive formation of bone, fusing the vertebrae. A number of the operations of the character have already proved successful to a degree.

## BEST DIGGING YET

ON PANAMA CANAL JOB

Excavation 2,633,437 Yards to 2,339,770 in Preceding Month.

Washington, Aug. 13.—The unusually rapid strike struck on the Panama canal work in June was increased in July. Colonel George W. Goethals, chief engineer of the canal work, reported to the war department today that the total amount of excavation for July was 2,633,437 cubic yards, as against 2,339,770 yards in June. During the month 87,498 cubic yards of concrete were laid, and 39,838 cubic yards of fill placed in dams.

This work is accepted by the department as highly creditable, as there were 10.92 inches of rainfall during July.
